

Check available Stock count:

↳ [match with coupon scenario code
&
check validity exclude from the
defined date.
&
check active or disabled
]

Available

Need to connect with Sayan!

There is an issue if will add all the data inside the Code Stock

②

get stock → Block (Race condition)

② Discuss with Sayeev

③

CC - inventory logic does not seem OK.

Where would coupon code reflect.

invoice

→ Only Referee.

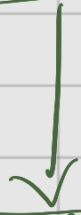

Level 1

Hotel fulfillment on
CLX

Select payment method

Create order

Redirect to checkout

Redirect to Redirect URL

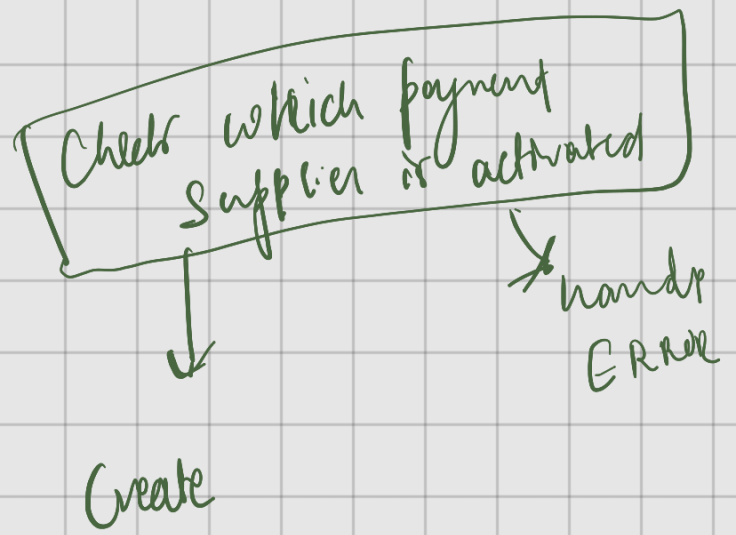

Handle
redirect
fulfillment
action

level 2

Select payment method

① Redirection handling need to be changed

a little bit to handle the new flow.

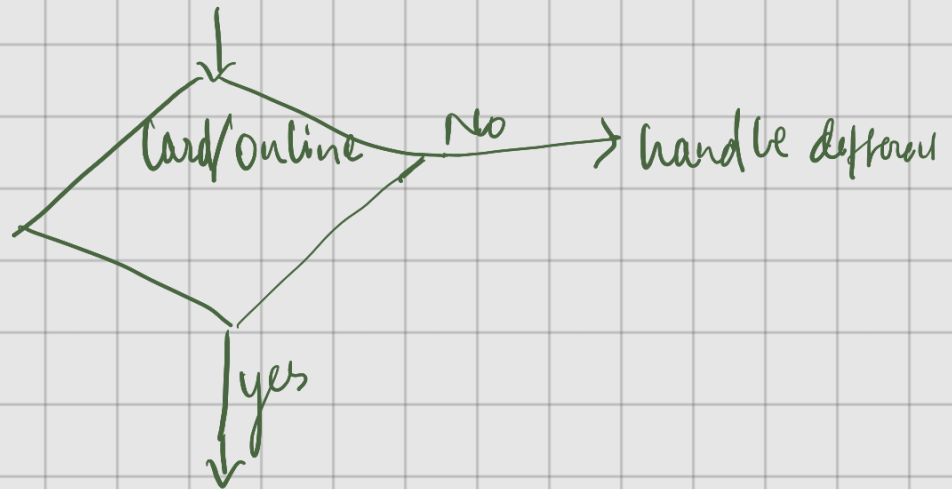

② Traveller payment needs to be changed also according to hotel.

③ ~~Billing Page~~ → Hotel ^{UT is available now}

④

flow.

Select Payment method

Create order table entry

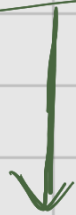

→ for the links

Add fulfillment schema
to the list

→ revalidate
schema

Customer clicks
on the links.

Take input from customer
for name email, country, city

Create order based
or fee breakup
and payment supplier set in
order table

Answers written below.

Coupon code

⑤ Rate condition
⑥ Get data = final stock

Create coupon code

Other field with scanned field will be used

① New CC set columns? ^{mistake}

② How does stock gets set? ✓

③ How to use a coupon code ✓

④ Release field not used. Research

Stock management

① coupon code stock

That time how much stock was

← initial stock

← Stock amount

Final
Stock

Add/Reduce

stock change + positive
- negative

addition to
stock amount

final stock =

Initial + stock change.

Adding stock.

initial stock = Available
stock of coupon

Sum of
all stock
change of
a coupon.

Stock amount = Entered
Amount by
user.

CC list + Final Stock =

CC Available
Stock —

(CC blocks
+ accrued
blocks)

① Use
invoice → Reduce → Release

Block

(2) Read $\longleftrightarrow$ block

(3) $\Rightarrow$ no need to worry
about of
Race conditions
